

Connecting bright minds.

Connecting bright minds.

It's inspiring when people work together to find a solution, when they make a breakthrough and create the future. This is the moment we work for at Mesago and the reason we devise and create the most popular exhibitions, conferences and events for the world of technology. We bring together the people that drive progress. Progress that helps us to tackle the challenges of the 21st century.

Participating in our events means taking away a wealth of knowledge, new contacts, an abundance of inspiration. And, as part of Messe Frankfurt's worldwide network, we are able to facilitate this exchange of ideas across borders.

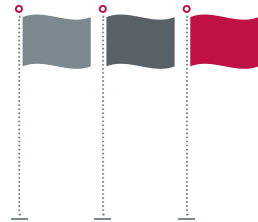

Connecting bright minds – this is the passion that motivates us day after day.

16 international trade fairs,
congresses and seminars

»Mesago makes events that focus on people meeting face to face. And in doing so provides a platform that boosts creativity in the longer term. We have experienced concrete interaction at the events with tangible results in meetings and an active exchange of ideas. We can convert our presence into collaborations – this is always beneficial to us.«
